About Kotak Gilt Fund

- Fund invests 80% or more in G-Secs across maturities.
- Fund currently has 100% allocation to securities comprising of Central, State Governments & TREPS with zero credit risk.
- Fund is ideal for investors with investment horizon of 2 years and above.

Portfolio Action

- We are maintaining the modified duration in the range of 9–12 years.
- Fed has opted to pause rate cuts during its recent policy meetings but remains open to implementing future reductions if economic data supports such measures. Initially, the market had anticipated two rate cuts for CY2025; however, expectations have now shifted to three to four cuts.
- RBI cut the repo rate by 25 bps, reducing it from 6.25% to 6%, in a bid to support the economy amid growing global headwinds stemming from sweeping tariffs and retaliatory duties imposed by US President.
- Given the growth-inflation dynamics and forward-looking projections, we expect at least 50 bps of further repo rate cuts over the next six months.
- The 10-year G-Sec is expected to trade in the 6.25–6.40% range but may move toward 6% as additional rate cuts are delivered.

Scheme Inception : - December 29, 1998. The returns are calculated by XIRR approach assuming investment of Rs.10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. The SIP Performance is for Regular Plan - Growth Option. Different plans have different expense structure.

Benchmark ; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. *All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV.
