Disclosure

- Data as on 30th June, 2025 unless otherwise specified,
- AUM: Assets Under Management
- YTM (Yield to Maturity) - The yield to maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond’s current market price, par value, couple interest rate and time to maturity
- Average Maturity - A bond’s maturity date indicates the specific future date on which an investor gets his principal back i.e. the borrowed amount is repaid in full. Average Maturity is the weighted average of all the current maturities of the debt securities held in the fund.
- Macaulay Duration - Macaulay Duration is a measure of how long it takes for the price of a bond to be repaid by its internal cash flows. Macaulay Duration is used only for an instrument with fixed cash flows. Modified Duration as the name suggests, is a modified version of the Macaulay model that accounts for changing interest rates.
- Tracking Error means the extent to which the NAV of the fund moves in a manner inconsistent with the movements of the benchmark index on any given day or over any given period of time due to any cause or reason whatsoever.
- NAV - The NAV or net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which investors enter or exit the mutual fund.
- Source: Kotak Mahindra Asset Management Company Limited (KMAMC) internal research.
- Continuous offer of units of all schemes available at NAV based prices.
- Past performance may or may not be sustained in future.
- To view details/updated details on Tracking error/Tracking difference of the Schemes, periodic updates about the Scheme(s), its portfolio and related disclosures, To view complete and detailed information about the Scheme(s), its asset allocation, investment strategy, etc please refer respective Scheme(s) Scheme information Documents
